PROFILE

As a dedicated Angular Developer with over 2 years of experience, I specialize in developing dynamic and responsive web applications. My expertise lies in leveraging Angular and TypeScript to create scalable, high-performance solutions that meet complex client requirements and enhance user experience. I have a strong background in front-end development, with a focus on writing clean, maintainable code and implementing industry best practices. Passionate about staying current with the latest technological trends, I am committed to continuous learning and contributing to the development community.
